**Re: Whitehorse Planning Scheme Amendment C172**

Dear Ms Neivandt,

The National Trust supports the amendment prepared by the City of Whitehorse to apply the Heritage Overlay to 27 new places, comprising 3 precincts, one group listing and 23 individual places (as detailed in the C172 Clause 43.01 schedule).

The National Trust (Vic) maintains a Heritage Register of Significant Places, including buildings, landscapes and trees. The following complex included in Amendment C172 is also listed by the National Trust (see classification report attached):

HO Schedule	Place Name	NTAV File No.	NTAV File Name
HO300	Burwood Skyline Drive-in Cinema	B7374	Burwood Drive-in Site

The National Trust acknowledges that the Amendment C172 is consistent with the objectives of planning for Victoria, as identified by the *Planning and Environment Act 1987*, in particular:

- To conserve and enhance those buildings, areas or other places which are of scientific, aesthetic, architectural or historical interest, or otherwise of special cultural value; and
- To facilitate development in accordance with the objectives of the Act.

We also recognise that the Amendment supports the National Trust's vision, "for the Australian community to understand, value and enjoy the built, natural and cultural heritage that creates our national identity".

The National Trust commends the City of Whitehorse's leadership in the recognition and protection of significant postwar heritage places.

In conclusion, The National Trust supports the adoption of the changes proposed in Amendment C172.

Yours faithfully,

Paul Roser  
Senior Manager, Advocacy and Conservation

### Statement of Significance

Last updated on - May 19, 2008

What is significant? Inspired by a visit to the USA in the early 1950s, Hoyts' Southern Division manager George Griffith Jnr, formed a syndicate to build Australia's first Drive-in. They found a site in Burwood on the rapidly growing eastern fringe of Melbourne's burgeoning suburban sprawl and commissioned a design from architects A C Leith Bartlett & Partners, in conjunction with RCA Australia. Construction proceeded through the latter half of 1953 and it opened on 17 February 1954 as the 'Burwood Skyline' with On the Riviera. It was an immediate success and cars were banked up along the Burwood Highway in both directions, and down McComas Grove, a

residential side-street, which provided entry access. The site was a natural amphitheatre, with the screen located on a rise across a small creek. It could accommodate 652 cars, and had two sessions per night. The exit was on the Highway alongside a modest neon Hoyts sign. A simple rectangular shed-like building in the centre was the diner, but for the first few years, car-hops (attendants) would take orders and deliver food to the cars. Facilities for families were a high priority, such as the provision of a large playground in front of the screen. The site was expanded within a couple of years to accommodate 700 cars, the diner was enlarged, an elaborate western themed barbeque area with lake and steak-house was added on the southern boundary, a cream-brick sided 'walk-in' was built for those without cars near the barbeque area and screen, and a merry-go-round was added to the playground. Side panels were added to the screen in later years as the land behind was developed for suburban housing. The drive-in continued successfully in this form for many years, with the only change being the replacement of the ticket box with a brick version in c1975. However, like so many other drive-ins in the early 1980s, in the face of declining attendances, it closed in 1983.

The site became the home of the local Council's electricity supply yard, and the diner and car ramps were replaced by a large industrial building and yards. The entry area was divided off and has become a small park, where the ticket box now serves as a barbeque shelter. The barbeque area, lake (now drained) and steak-house remain more or less intact within the site, along with the 'walk-in' structure.

How is it significant? The Burwood Drive-in site is significant for historic and social reasons at a Local level.

Why is it significant? The Burwood Drive-in site is historically and socially significant as the location of the first Drive-in to be built in Australia, one whose immediate popularity ushered in a wave of Drive-ins across the country. It is one of five Drive-in sites to remain at least partly intact (three are still operating) out of the 60 that once existed in Victoria. These are the last remnants of a once extremely popular cultural phenomenon, one that appears to have had a real impact only in the US, Canada and Australia.

Inspired by American cultural trends, drive-ins, like motels, were a new type of private or domestic space, a mobile extension of the family living room, and characterized a trend in personal behaviour to be less formal and inhibited in public spaces. They grew out of the extraordinary popularity and increasing affordability of cars and provided a novel and easy form of entertainment. They catered to a wide range of audiences, allowing a whole family with young children the convenience of staying in their car, for teenagers to socialize apart from their parents and especially for young adults who were attracted to particular film genres and the intimate private space provided by the car.

The Burwood site was particularly popular and catered to families to a greater extent than many others, as evidenced by the large playground (now gone) and the extensive barbeque facilities (which still remain partly intact).

The 'walk-in' building, for patrons without cars, is one of only two to survive in Victoria.
