### 21.10-1 Overview

The City of Glen Eira is essentially an inter-war municipality founded upon the development of Melbourne's electric tramway system and the electrification of its suburban railways. Important examples of nineteenth and early twentieth century housing and commercial development add interest to the City. At the national level, it remains today as a rare, surviving, middle distance, middle class municipality of the inter-war era, retaining its system of street tramways. A number of areas and individual properties comprehensively demonstrate important eras in the growth of Glen Eira and survive in a reasonably intact state. These have been identified in the Glen Eira Heritage Management Plan 1996 and Addendum to the Glen Eira Heritage Management Plan 2014. Some have also been recognised by Heritage Victoria and the National Trust.

Glen Eira is currently experiencing a development boom, which means the pressure to demolish older buildings will increase. There is also pressure to adapt and develop heritage places to suit contemporary lifestyles. There is increasing concern that the City's heritage is under serious threat. There is a need for clear design guidelines for new development both within and adjacent to heritage precincts. ~~It is becoming increasingly apparent that as property values rise, so too does the quality of the buildings which are making way for new development. One of the ways that residents can ensure that heritage values are protected is to embrace the introduction of heritage controls.~~
